## JOINT RISK ASSESSMENT TOOL

**The Joint Risk Assessment Tool (JRAT) is an interactive, easy-to-use, automated system designed to assist users with the application of risk management in accordance with Joint Publication 3-0, Joint Operations, and Service-specific publications. As the name implies, JRAT is a joint-Service tool that contains portals for the Army, Marine Corps, Navy, Air Force and Coast Guard.**

<https://jrat.safety.army.mil>

## Each service portal contains:

**Mishap Statistics** – offers easy access to service-specific mishap data.

**Vignettes** – allows users to review and download vignettes related to specific missions and provides basic information on relevant hazards and controls.

**Mishap Summaries** – displays mission-related mishap summaries for consideration in mission planning and risk management.

**Guidance & Resources** – facilitates quick retrieval of mission-relevant information to aid in the risk management process. Available content may include publications, links, videos, posters and presentations.

**Deliberate Risk Management Worksheet (DRAW)** – provides users the option to create their own mission types, subtasks, hazards and controls along with the ability to select from potential subtasks, hazards and controls identified for various pre-populated mission types and off-duty activities. This allows users the opportunity to capture subtasks, hazards and controls they may not have previously considered.
